Team Member: BHAGYARATHI P

Problem Statement:

There is currently no efficient system in place to track, categorize, and analyze family expenses in a way that is integrated, automated, and accessible in real-time. This leads to poor budget planning, missed payments, overspending, and a lack of financial visibility.

Objective:

To design and implement a solution using **ServiceNow** that allows family members to:

1. **Input and categorize expenses** easily via a user-friendly interface or mobile portal.
2. **Automate recurring expenses** (e.g., rent, subscriptions).
3. **Track total and category-wise spending** on a monthly/weekly basis.
4. **Set spending limits and receive alerts** when thresholds are crossed.
5. **Generate reports and dashboards** to visualize trends and support better financial decisions.
6. **Share visibility and responsibilities** across family members via roles or user groups.

- **ServiceNow App Development** (App Engine Studio)
- **Custom Tables & Data Modeling**
- **Form Design & UI Customization**
- **Flow Designer** (for automation)
- **Business Rules & Scripting**
- **Reporting & Dashboards**
- **User Roles & Access Control (ACLs)**

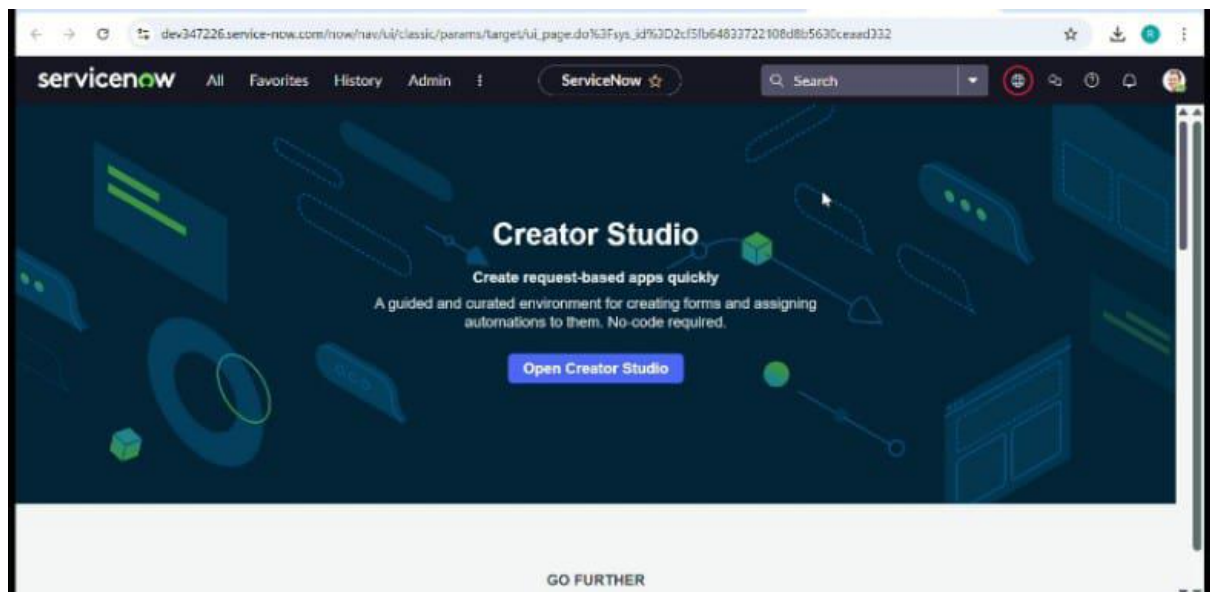

TASK INITIATION

Milestone 1 : Instance

Activity 1: Setting up ServiceNow instance

1. Sign up for a developer account on the ServiceNow Developer site "<https://developer.servicenow.com>".
2. Once logged in, navigate to the "Personal Developer Instance" section.
3. Click on "Request Instance" to create a new ServiceNow instance.
4. Fill out the required information and submit the request.

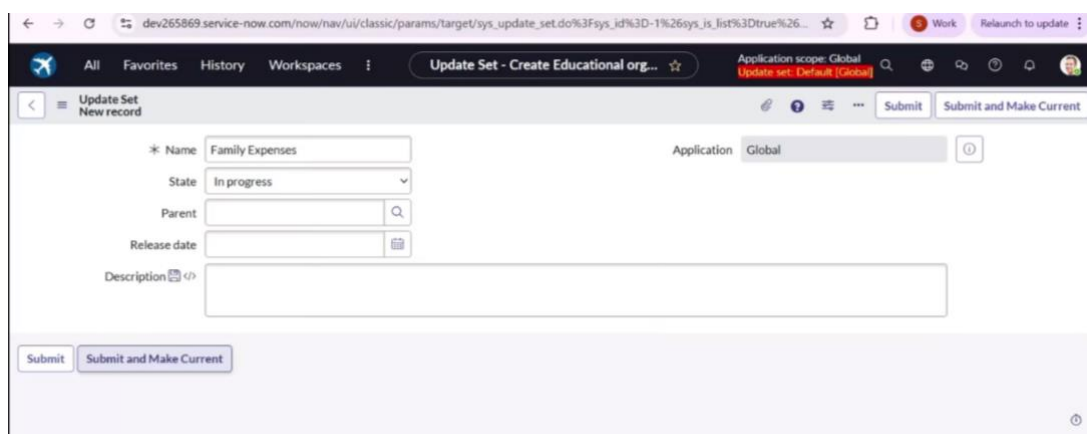

5. You'll receive an email with the instance details once it's ready.
6. Log in to your ServiceNow instance using the provided credentials.
7. Now you will navigate to the ServiceNow.

Milestone 2: New Update Set

Activity 1: Creation of New Update Set

1. Go to All >> In the filter search for Local Update set > click on New.
2. Enter the Details as:
Name : Family Expenses
3. Then click on Submit and Make current.

Milestone 3: Table(Family Expenses)

Activity 1: Creation of Family Expenses Table

1. Go to All > In the filter search for Tables > click on New.
2. Enter the Details:
 Label : Family Expenses
 Name : Auto-Populated
 New menu name : Family Expenditure
3. Go to the Header and right click there>> click on Save.

Delete Column Update

5. Go to All >> In the filter search for Number Maintenance >> select Number Maintenance

6. Click on New.

7. Enter the below Details:

Table : Daily Expenses

Prefix : DFE

8. Click on Submit.

The screenshot shows the 'Number - New Record' form in ServiceNow. The form is for the 'Daily Expenses' table. The 'Prefix' field is set to 'DFE'. The 'Number' field is set to '1,000'. The 'Application' field is set to 'Global'. The 'Number of digits' field is set to '7'. There is a 'Submit' button at the bottom left. Below the form, there is a 'Related Links' section with a link to 'Show Counter'.

Activity 4: Configure the Form

1. Go to All >> In the filter search for Daily Expenses >> Open Daily Expenses
2. Click on New
3. Go to the Header and right click there >> click on Configure >> Select Form Design
4. Customize or Drag Drop the form as per your requirement.
5. Make Number Read-Only Field by clicking on the gear icon and checking Read-Only
6. Make Date, Family Member Name Mandatory Field by clicking on the gear icon and checking Mandatory
7. Click on Save.

The screenshot shows the 'Form Design' interface in ServiceNow. The form is for the 'Daily Expenses' table. The form is titled 'Daily Expenses [u_daily_expenses]'. The form has two columns. The first column contains the 'Number' field, 'Date' field, and 'Created' field. The second column contains the 'Family Member Name' field, 'Expense' field, and 'Updated' field. The 'Number' field is set to 'Read-Only'. The 'Date' field is set to 'Mandatory'. The 'Family Member Name' field is set to 'Mandatory'. The 'Expense' field is set to 'Mandatory'. The 'Created' field is set to 'Read-Only'. The 'Updated' field is set to 'Read-Only'. The 'Comments' field is set to 'Read-Only'. The 'Form Design' interface includes a 'Fields' list on the left, a 'Field Types' list, and a 'Formatters' list. The 'Form Design' interface also includes a 'Save' button.

Milestone 5: Creation of Relationship

Activity 1: Creation of Relationship between Family Expenses and Daily Expenses tables

1. Go to All >> In the filter search for Relationships >> Open Relationships
2. Click on New.

- Enter the details:
Name : Daily Expenses
Applies to table : Select Family Expenses
Daily Expenses : Select Daily Expenses
- Click Save.

Milestone 6: Configuring Related List on Family Expenses

Activity 1: Configuring Related List on Family Expenses

- Go to All >> In the filter search for Family Expenses >> Open Family Expenses
- Click on New
- Go to the Header and right click there>> click on Configure >> Select Related Lists
- Add Daily Expenses to the Selected Area.
- Click on Save

Milestone 7: Business Rules

Activity 1: Creation of Business Rules

1. Go to All >> In the filter search for Business Rules.
2. Under System Definition Select Business Rules then click on New.
3. Enter the Details:
Name : Family Expenses BR
Table : Select Daily Expenses
Check Advanced

The screenshot shows the 'Business Rule - New Record' form in ServiceNow. The form includes a header with the ServiceNow logo and navigation tabs. Below the header, there is a description of a business rule. The main form area contains fields for 'Name' (Family Expenses BR), 'Table' (Daily Expenses [u_daily_expens...]), 'Application' (Global), 'Active' (checked), and 'Advanced' (checked). At the bottom, there are tabs for 'When to run', 'Actions', and 'Advanced'. A blue box at the bottom of the 'When to run' tab contains the text: 'Specify whether the business rule should run on Insert or Update. Use Filter Conditions to specify under which conditions the business rule should run.'

4. In when to run Check Insert and Update

The screenshot shows the 'When to run' tab in the 'Business Rule - New Record' form. It includes a blue box with the text: 'Specify whether the business rule should run on Insert or Update. Use Filter Conditions to specify under which conditions the business rule should run.' Below this, there are fields for 'When' (before), 'Order' (100), and checkboxes for 'Insert' (checked), 'Update' (checked), 'Delete' (unchecked), and 'Query' (unchecked). There are also buttons for 'Add Filter Condition' and 'Add OR Clause', and a section for 'Filter Conditions' with a dropdown menu for '-- choose field --', a dropdown for '-- oper --', and a text input for '-- value --'. At the bottom, there is a 'Role conditions' section with an edit icon. A 'Submit' button is located at the bottom left.

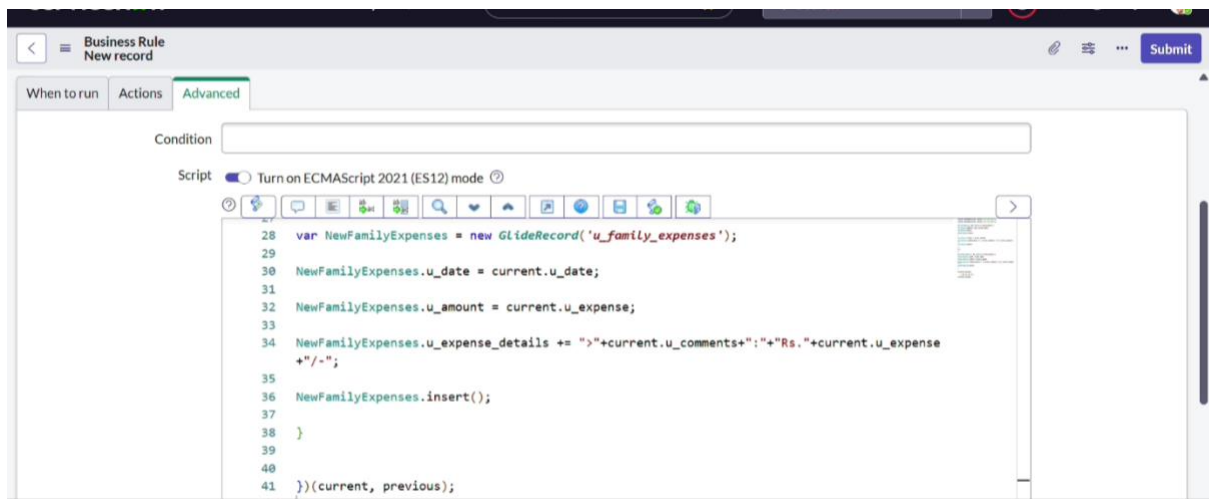

5. In Advance(we write the code): Write the below code >>>
(functionexecuteRule(current, previous /*null when async*/) {
varFamilyExpenses = new GlideRecord('u_family_expenses');

```

FamilyExpenses.addQuery('u_date',current.u_date);
FamilyExpenses.query();
if(FamilyExpenses.next())
{
FamilyExpenses.u_amount += current.u_expense;
FamilyExpenses.u_expense_details += ">" + current.u_comments + ":" + "Rs." + current.u_expense + "/-";
FamilyExpenses.update();
}
else
{
varNewFamilyExpenses = new GlideRecord('u_family_expenses');
NewFamilyExpenses.u_date = current.u_date;
NewFamilyExpenses.u_amount = current.u_expense;
NewFamilyExpenses.u_expense_details += ">" + current.u_comments + ":" + "Rs." + current.u_expense + "/-";
NewFamilyExpenses.insert();
}
})(current, previous);

```

6. Go to the Header and right click there>> click on Save.

Milestone 8: Relationship

Activity 1: Configure the Relationship

1. Go to All >> In the filter search for Relationships >> Open Relationships.
2. In that, open Daily Expenses Relationship.
3. For Applies to table : Select Family Expenses.
4. In Query with : write the below Query.

```
(functionrefineQuery(current, parent) {
```

```
// Add your code here, such as current.addQuery(field, value);  
  current.addQuery('u_date',parent.u_date);  
  current.query();
```

```
})(current, parent);
```

5. Click on Update.
